EXPERIENCE

NIIT LTD, Bangalore - *Software Engineer Trainee*

September 2022 - February 2023

- Worked in a team of three members and developed full-stack applications.
- Was responsible for developing, testing scalable and flexible full-stack applications.

EDUCATION

S.K Somaiya Degree College of Arts, Science and Commerce, Mumbai -
Bachelor of Science (Computer Science)

July 2019 - June 2022

Projects

1. **JukeBox** - This App was created using Java programming language and MYSQL database. In this app user can add, play, view and delete songs from playlists. Building this project helped in understanding of database connectivity through java.
2. **E-Commerce Web-App** - This app was built using Angular and TypeScript as frontend, java as backend and MySql and MongoDB as databases. User can register, login, view, buy and delete products from their carts. Building this Full-Stack App helped me understand how frontend and backend communicate with each other and process the user requests.
